XPOS PLUS+

15,6" Display
FANLESS & HIGH-PERFORMANCE POS PC

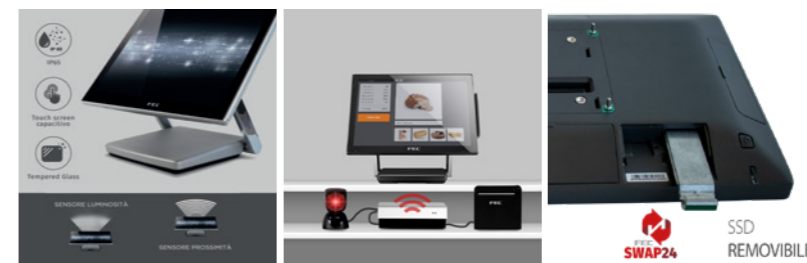

XPOS+ represents the future of POS PCs and is a true powerhouse of technology housed in a uniquely designed case.

Based on FANLESS processors—whether Core i3 or Core i5—it guarantees maximum performance and, at the same time, reliability, thanks in part to the option to configure memory in RAID 1.

GENERAL DESCRIPTION

- Intel® Core i3/i5 processor
- High-speed NVMe SSD with 2 expansion slots configurable in RAID 1
- 15.6" FHD 1920x1080
- Ambient light and proximity sensor
- Quick-release, screwless base
- VESA 100 mounting
- I/O module integrated into the base
- IP65-rated front panel
- 10-point capacitive touchscreen
- Windows 10/11 IoT, Windows 11 PRO, Linux Ubuntu

The base has been redesigned and improved compared to the previous model, allowing for quick, screw-free removal and any angle of tilt to meet all the needs of a modern checkout; available in silver gray.

Integrated ambient light and proximity sensors maximize the system's ergonomics and reduce power consumption; the IP65-rated front panel makes the system suitable for all operating conditions.

XPOS+ is offered with a wide range of secondary or integrated monitors and numerous optional add-ons to choose from based on the checkout counter's needs.

15"/15,6" Display
FANLESS POS PC

The PP-9735(W) is a fanless all-in-one PC that combines power, form factor, and extended lifecycle in an enterprise-class POS PC.

Based on an Intel® Celeron J6412 processor and equipped with high-speed NVMe SSDs, it is the perfect PC for applications requiring high computing performance in the retail or hospitality sectors.

A fanless solution that utilizes a die-cast aluminum chassis for heat dissipation and is equipped with high-speed NVMe SSDs to enhance the solution's reliability and quiet operation.

The stable and robust single-hinge stand allows for a wide range of display tilt to accommodate a variety of installation configurations.

Pre-configured for the installation of add-on drives that can be integrated on the side panel (MSR magnetic card readers, RFID readers, Dallas I-button key readers) and the option to install customer displays and secondary monitors allow for a high level of solution customization. VESA 100 mounting compatibility for wall or pole installations and extensive I/O connectivity.

KITCHEN MONITOR

KP-915XW

**15,6" / 21,5" Display
ANDROID KITCHEN MONITOR**

Aluminum chassis with ceramic coating, 15.6" or 21.5" display Full HD and Android 14 operating system.

Based on Mediatek® G700 processor and suitable for professional kitchen environments, where hygiene, durability, and reliability are essential, even in the most demanding conditions.

Designed for food service environments, the KP Series Panel PC with Android operating system features a rugged, fully sealed design. The aluminum chassis with ceramic coating ensures excellent heat dissipation, easy cleaning, and resistance to oil, water, and corrosive agents.

Certified to ASTM B117 (2,000 hours in salt spray), it is ideal for critical environments. Wear resistance is certified to ASTM D4060 (6,000 cycles), with a hardness of 6H+ (ASTM D3363), ensuring long-lasting durability even under extreme conditions.

The waterproof design includes a gasket along the panel, waterproof silicone buttons, filters in the air vents, and compatibility with work gloves. Available in 15.6" and 21.5" sizes, with a Full HD display, fanless design, and PCAP touch for smooth interaction even in challenging environments.

GDT-7100N

FANLESS BOX PC

The GDT-7100N is a mini fanless BOX PC, compact with Intel® N100 processor, 4K graphics and low power consumption, designed to be silent and reliable for special applications.

The GDT-7100N mini BOX PC is a compact fanless PC, ideal for special applications requiring silence, reliability and low power consumption (only 6W TDP). Equipped with Intel® N100 processor with 4K UHD 600 graphics and integrated 6-channel audio card, it offers high performance similar to a Core i3.

Its compact dimensions (127.5x145x34mm) and lightweight (~960g) make it versatile for multiple applications. It features numerous I/O ports including USB, HDMI, DP, Ethernet, and RS232/485 serial ports, and supports integrated WiFi and Bluetooth. It is configurable with DDR4 RAM up to 16GB and NVME SSD from 128GB to 1TB, making it suitable also for AI applications thanks to the processor's neural computing capabilities.

Modular totem available in single-sided or double-sided version, can be equipped with 32" monitor and Celeron or Core i3/i5 BOX PC, with wall or floor installation.

CUSTOMIZABLE IN MATERIALS, FINISHES, COLORS

CUSTOMIZABLE IN MATERIALS, FINISHES, COLORS

WALL OR BASE INSTALLATION

FEC Italia's XELF KIOSK 32" totem is versatile with a modern design, engineered to ensure structural solidity and a pleasant visual impact. The central structure, composed of customizable frame, doors, and covers, is made with anti-corrosion materials to optimize production, assembly, and transport. The covers are configurable in various materials, finishes, and colors, covering the internal mechanics.

Il totem può essere configurato con diverse soluzioni hardware, come un BOX PC e un monitor da 32 pollici, ed è disponibile in versioni monofacciale e bifacciale, con possibilità di installazione su base o a parete. La struttura è progettata per facilitare l'uso e la manutenzione, con componenti personalizzabili e intercambiabili che si adattano a vari stili di arredamento, creando un'armonia visiva distintiva.

Independent covers allow for simple maintenance, such as repainting in case of scratches or changing color and finish. Thanks to the wrapping technique, each piece can be customized with a minimum order of 10 pieces.

SOFTPOS TERMINAL

PORTABLE TERMINAL FOR SOFTPOS PAYMENTS

Portable Android terminal with optional printer for managing and collecting electronic and digital SoftPOS payments. Enabled for the GetYourCash solution.

The handheld device allows you to manage payments on the go thanks to NFC technology, without the need for an additional dedicated POS terminal. FEC Italia handheld devices are also compatible with the GetYourCash solution offered by Ultroneo Payments. GetYourCash is a service tailored to the needs of small businesses and small/medium-sized merchants; easy to set up and intuitive to use; start accepting payments in less than a day without needing to open a new bank account. Accept contactless payments with cards from the most popular payment networks; features a built-in printer for issuing receipts.

GENERAL DESCRIPTION

- Mobile payment management without a dedicated additional POS
- Immediate and free activation
- Acceptance of all types of contactless cards
- Acceptance of all major payment circuits and digital wallets
- Fast and reliable support
- Dedicated support from a specialized team

PRINTERS AND SCANNERS

TP-100

THERMAL RECEIPT PRINTER

Compact, versatile, affordable, the TP-100 is an 80-column thermal printer ideal for order printing, with high print speed up to 250mm/sec and autocutter mechanism using high-reliability motors to ensure greater quality without jams. Also available in Wi-Fi version.

GENERAL DESCRIPTION

- 80-column thermal printer for 80 mm rolls
- Print speed up to 250 mm/sec, automatic cutter tested to withstand 1.5 million cuts / Easy Paper Loading
- Dimensions 127 W x 127 D x 134 H mm
- Integrated buzzer and standard USB, serial, and Ethernet connectivity

EPSON FP 81 II RT

FISCAL PRINTER
AND ELECTRONIC TAX RECORDER

The EPSON FB 81II RT fiscal printer is a certified thermal POS printer for issuing and transmitting documents with fiscal value and therefore functioning as an Electronic Tax Recorder. Authorized to issue invoices and credit notes, it supports 5 different VAT rates, 100 departments, and 20,000 PLUs and provides daily and periodic reports as well as itemized receipts, sending sales data in real time directly to the IRS.

GENERAL DESCRIPTION

- 46-column thermal printer for rolls of 58/60/80 mm width and up to 80mm diameter.
- Print speed up to 150 mm/sec, automatic cutter tested to withstand 1.5 million cuts
- Dimensions 140 W x 199 D x 146 H mm
- DGFE housing on 4 GB SD - up to 10 years of fiscal data and up to 20,000 storable PLUs / Intelligent Functions: SMTP email Client, Web Server, Web Service and XML
- Included LCD graphic display 2x16, black color on blue background, serial connection, height adjustable on 3 different levels

INTEGRATED SCANNER HANDHEL SCANNER

Integrated 1D/2D scanner on PP series models, can be positioned either on the side or at the bottom of POS-PCs for a completely integrated solution. Ideal both for operator recognition and for managing barcodes of various types and loyalty cards.

Equipped with a high-performance imaging chip, this handheld scanner is able to accurately scan 1D and 2D barcodes even while moving, also thanks to its high vibration tolerance. The fast and accurate decoding algorithm allows for easy and efficient scanning even in the presence of damaged or deteriorated barcodes. Optional scanner stand.

SECONDARY DISPLAYS & INTEGRABLE ADD-ON READERS

SECONDARY DISPLAYS

Integrable or stand-alone secondary displays in 10" or 15.6" for the PP or XPOS series*.

The AerARM system includes customer-side secondary displays with arm mount or integratable at the top of Panel PCs. The 10" and 15" versions are also available with optional touch screen.

POLES AND VESA MOUNT

X-POLE is a pole-mounting system designed to offer maximum flexibility and ease of installation. Thanks to the VESA mount and internal cable routing, it allows for customized PC positioning based on operational needs and available space.

Ideal for retail or hospitality environments, it ensures a stable, tidy, and functional checkout or PC station, guaranteeing a solid installation that is perfectly integrated into the workspace.

Wall mount designed for static applications in professional environments.

Includes a convenient compartment for the power supply, compatible with VESA standards, for a neat and compact installation.

RFID READERS

Peripheral integrable on the PC side of the PP or XPOS series, ideal for applications with unique recognition.

Extremely useful both for identification and for managing loyalty cards. Built with electronics in serial emulation (virtual COM) or HID keyboard emulation, it is available in 2 colors, galaxy grey and silver.

MSR READERS

Peripheral integrable via USB in PP and XPOS series systems. Supports ISO7810, 7811, AAMVA magnetic cards; for XPOS supports ISO1/2/3 tracks. Available in two colors, silver and galaxy grey. These are the most widely used recognition peripherals both in POS environments and on Production Lines.

I-BUTTON READERS

Add-on module for Dallas keys, ideal for numerous applications, especially in the restaurant environment. Available in two colors, silver and galaxy grey, the I-button add-on reader integrates perfectly with PP and XPOS systems, fitting into the dedicated slot to the right of the display.

FEC REMOTE MANAGEMENT PLATFORM

FEC PLATFORM

REMOTE MANAGEMENT PLATFORM

Abbiamo sviluppato una piattaforma di servizi per rendere ancora più completa l'esperienza d'uso professionale dei Panel PC FEC Italia.

FEC Remote Management Platform is:

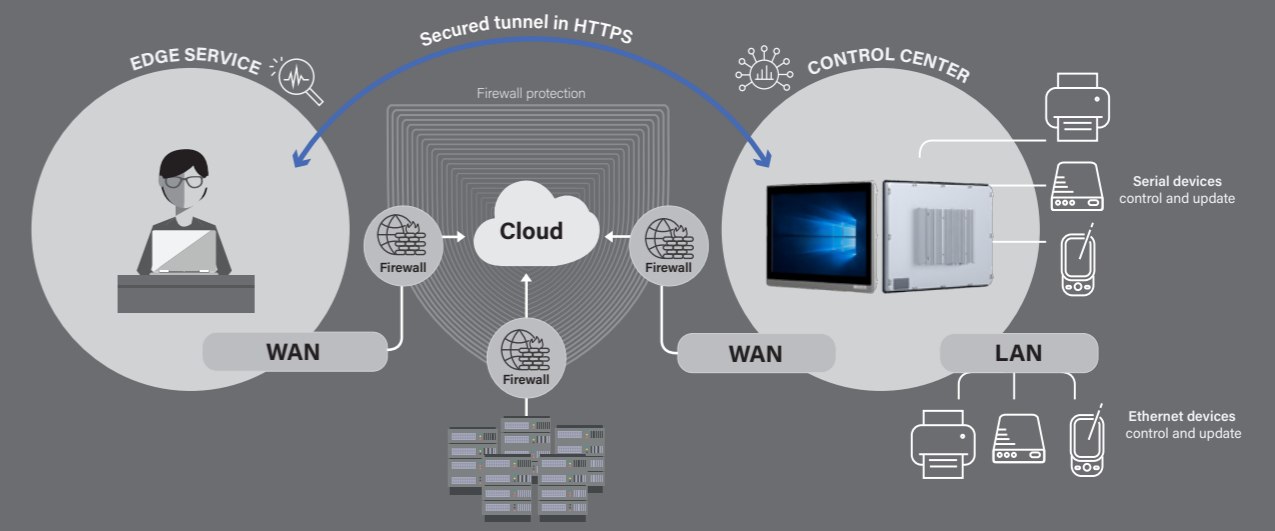

- ▶ secure thanks to the platform's cybersecurity protocols
- ▶ compatible with Windows 10 or later / Android operating systems® 7 and later
- ▶ easily integrable with other monitoring platforms and management systems.

FEC PLATFORM INCLUDES:

 <p>NOW Edge</p> <p>A runtime client installed by default on Panel PCs that collects all information on system operation of the system: serial number, model, installed software, BIOS, installed hardware.</p>	 <p>NUBIS Control center</p> <p>A cloud-based application that allows remote control of many key activities.</p>	 <p>NUBIS Storage</p> <p>A cloud space to share documents and updates between different PCs in the same facility or in different facilities.</p>
---	--	--

A SECURE CONNECTION FOR REMOTE ASSISTANCE

- Edge and Control Center connect through a tunneled connection HTTPS encrypted to ensure maximum security of your IT infrastructure IT infrastructure. Through the control center it is possible to perform:
- remote assistance for:
 - monitor anomalies and malfunctions
 - understand what happened
 - resolve the fault remotely
 - setting and management of Alerts for:
 - PC temperature too high
 - full disk
 - CPU and RAM load
 - app crash detection
 - scheduling of programmed actions: for example system updates, at predefined times, without interrupting the regular operation of the machine during working hours.

WARRANTIES

FEC SWAP24

A RISK-FREE BUYING AND USAGE EXPERIENCE

Repairing your all-in-one PANEL PC or most of our BOX PCs will no longer be a problem with the new FEC SWAP24 support service that allows you to receive in advance a new system equivalent to the one purchased, guaranteeing maximum operational continuity.

The FEC SWAP24 service, included in the purchase price for the first 12 months, entitles the holder to a swap (advance replacement) of the faulty system with a refurbished one, i.e., one subjected to a processing and control procedure to restore it to a functional state equal to new, including verification and any cosmetic repairs, except for the drive which will be replaced with the one from the faulty machine to ensure absolute continuity of work without the need for lengthy software installation processes. The FEC SWAP24 warranty is extendable up to 3 or 5 years as further proof of the reliability of FEC Italia systems.

FEC Italia KASKO

FOR BUSINESS MOBILITY SOLUTIONS

We have chosen to provide all-inclusive protection for our professional Mobile Computers, including coverage against accidental damage. This allows us to offer our customers uninterrupted operations and a high-quality professional service. FEC ITALIA KASKO is included in the price of our handheld computers and tablets. Our Mobile Computers are also covered by the "FEC Swap 24" support service for maximum operational continuity.

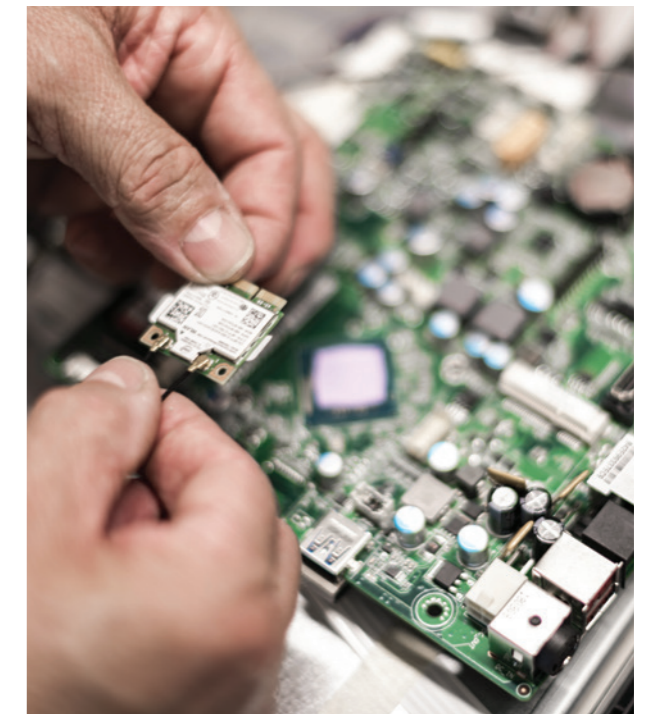

LONG-TERM PROTECTION

FEC warranties, included or optional, provide 12-month coverage, but are extendable up to a maximum of 3 years.

THE ADVANTAGES OF OUR OFFER

- **PRE-SALES SUPPORT**
Dedicated consulting for our customers by true industry specialists.
- **PRODUCTS**
Technologically advanced solutions of unquestionable build quality.
- **AFTER-SALES SUPPORT**
Innovative warranty solutions and high-profile systems staff for solving all post-sales issues.
- **ONLINE TICKETING PORTAL**
Connected and direct customer service to provide always active and effective support.

CUSTOMER CARE

A CUSTOMER-ORIENTED COMPANY

Alongside its extensive product range, FEC Italia provides a professional and flexible technical-commercial structure and a fast, professional customer service. The company specializes in the professional sector and has a strongly customer-oriented structure focused on its needs.

AN IN-HOUSE TEAM OF SPECIALIZED TECHNICIANS

FEC Italia CUSTOMER CARE consists of a TEAM of specialized technicians, reachable by phone, e-mail or web for assistance and support requests and for requesting repair services. The FEC Italia structure is optimized to maximize technical support resources with the goal of providing customers with fast responses and accurate repairs in the shortest time possible. We offer on-SWAP and on-center customer services; with the new FEC Italia IT infrastructure, all support ticket management can be monitored in real time directly by customers on our website www.fecpos.it.
